

## Statement of Verification

BREG EN EPD No.: 000202

Issue 03

This is to verify that the  
**Environmental Product Declaration**  
provided by:  
**Kingspan Insulation B.V.**

is in accordance with the requirements of:  
**EN 15804:2012+A1:2013**  
and  
**BRE Global Scheme Document SD207**

This declaration is for:  
**Kooltherm K12 Framing Board**

### Company Address

Lingewei 8  
4004 LL Tiel  
The Netherlands

A handwritten signature in black ink, appearing to read 'E Baker'.

Emma Baker  
Operator

17 August 2018  
Date of this Issue

06 March 2018  
Date of First Issue

05 March 2023  
Expiry Date

This Statement of Verification is issued subject to terms and conditions (for details visit [www.greenbooklive.com/terms](http://www.greenbooklive.com/terms).)

To check the validity of this statement of verification please, visit [www.greenbooklive.com/check](http://www.greenbooklive.com/check) or contact us.

## Environmental Product Declaration

EPD Number: 000202

### General Information

EPD Programme Operator	Applicable Product Category Rules
BRE Global Watford, Herts WD25 9XX United Kingdom	BRE Environmental Profiles 2013 Product Category Rules for Type III environmental product declaration of construction products to EN 15804:2012+A1:2013
Commissioner of LCA study	LCA consultant/Tool
Kingspan Insulation B.V. Lingewei 8 4004 LL Tiel The Netherlands	BRE LINA tool
Declared/Functional Unit	Applicability/Coverage
1m <sup>2</sup> of Kooltherm K12 insulation at a thickness that gives an R-value of 3.000m <sup>2</sup> .K/W	Product Specific.
EPD Type	Background database
Cradle to Gate with options	ecoinvent

### Demonstration of Verification

CEN standard EN 15804 serves as the core PCR <sup>a</sup>

Independent verification of the declaration and data according to EN ISO 14025:2010

Internal  External

(Where appropriate <sup>b</sup>)Third party verifier:  
Nigel Jones

a: Product category rules

b: Optional for business-to-business communication; mandatory for business-to-consumer communication (see EN ISO 14025:2010, 9.4)

### Comparability

Environmental product declarations from different programmes may not be comparable if not compliant with EN 15804:2012+A1:2013. Comparability is further dependent on the specific product category rules, system boundaries and allocations, and background data sources. See Clause 5.3 of EN 15804:2012+A1:2013 for further guidance

## Manufacturing site(s)

Kingspan Insulation B.V.

Lingewei 8  
4004 LL Tiel  
The Netherlands

## Construction Product:

### Product Description

Kingspan **Kooltherm K12** Framing board premium performance rigid thermoset fibre free phenolic insulation core faced on both sides with a low emissivity composite foil facing which is autohesively bonded to the insulation core during manufacture.

Product information on [www.kingspan.com](http://www.kingspan.com)

### Technical Information

Property	Value, Unit
Thermal conductivity - EN 13166:2012+A2:2016	0.020 W/m.K
Other technical information see Declaration of Performance: <a href="https://www.kingspan.com/roe/el-gr/products/insulation/declaration-of-performance">https://www.kingspan.com/roe/el-gr/products/insulation/declaration-of-performance</a>	

## Main Product Contents

Material/Chemical Input	%
Rigid thermoset fibre free phenolic insulation core	85.7
Low emissivity composite foil facing	14.3

Percentages applicable for 1m<sup>2</sup> of insulation at a thickness that gives an R-value of 3.000m<sup>2</sup>.K/W (60 mm of Kooltherm K12)

## Manufacturing Process

Kingspan Kooltherm is made through a manufacturing process in which a foam forms an insulating core between two facing elements. At the start of the process a mix of chemicals is added directly to the bottom layer of facing and then expands to meet the top layer of facing. As it dries, the foam becomes tacky and adheres itself to the facing, top and bottom. Once it has reached the necessary thickness the foam is cured under pressure. It is then moved onto a secondary oven to cure and harden, becoming bright pink in colour. The insulation boards are then cut into the necessary sizes, packaged and sent to the loading bay for collection.

## Process flow diagram

## Construction Installation

The product will be installed in framing applications

## Use Information

The product will be left alone after installation, there are no known associated environmental impacts.

## End of Life

The insulation will be removed for disposal when the building reaches the end of its life. The foam can be used for waste to energy. However, for this study it is assumed that the majority of the waste is sent to landfill.

## Life Cycle Assessment Calculation Rules

### Declared / Functional unit description

1m<sup>2</sup> of Kooltherm K12 insulation at a thickness that gives an R-value of 3.000m<sup>2</sup>.K/W

### System boundary

Cradle to Gate with options

### Data sources, quality and allocation

This EPD covers all Kooltherm K12 phenolic insulation manufactured at one location, representing 100% of production in 2015. Information on raw materials used has been provided by sub-suppliers and additionally the Ecoinvent 3.2 database has been consulted. Information on production process is measured data by Kingspan Insulation B.V. Amounts of waste / energy consumption / water / emissions / raw materials used / packaging / transport / etc. has been allocated to the share of Kooltherm K12 on the total Kooltherm production in this factory over the year 2015.

### Cut-off criteria

No inputs or outputs have been excluded. All raw materials, packaging materials, associated transport to the plant and from the plant to the building site, process energy, water use, direct production waste and installation waste and emissions are included.

## LCA Results

## Scenarios and additional technical information

Scenarios and additional technical information			
Scenario	Parameter	Units	Results
A4 – Transport to the building site	Transport with Kingspan 24T trucks and external transporters		
	Fuel type / Vehicle type	Litre of fuel type per distance or vehicle type	Truck 24T
	Distance:	km	177
	Capacity utilisation (incl. empty returns)	%	90
	Bulk density of transported products	kg/m <sup>3</sup>	35
A5 – Installation in the building	Installation done by contractors, assumption of 2% installation losses		
B2 – Maintenance	The insulation does not require maintenance once installed		
B3 – Repair	The insulation does not require repair		
B4 – Replacement	The insulation does not require replacement		
B5 – Refurbishment	The insulation does not require refurbishment		
Reference service life	60 year		
B6 – Use of energy; B7 – Use of water	The insulation lasts the life span of the building - no operational energy- or water use applicable		
C1 to C4 End of life,	Disposal – waste routes (in kg of the declared functional unit)		
	Recycled / reused	kg	0.02
	Incinerated	kg	0.19
	Landfill	kg	1.89
	Distance to waste processing site	km	177
