

## Statement of Verification

BREG EN EPD No.: 000238

Issue 02

ECO EPD Ref. No. 00000838

This is to verify that the

### Environmental Product Declaration

provided by:

**Amtico International**

is in accordance with the requirements of:

**EN 15804:2012+A1:2013**

and

**BRE Global Scheme Document SD207**

This declaration is for:

**Amtico Access Luxury Vinyl Floor Tiles**

### Company Address

Amtico International  
Kingfield Road  
Coventry  
UK  
CV6 5AA

A handwritten signature in black ink, appearing to read 'E Baker'.

## Construction Product

### Product Description

Amtico Access is a design-led, loose lay vinyl tile collection, consisting of 43 products: 18 Wood, 10 Stone and 15 Abstract designs.

Amtico Access is a 5.0 mm product with a 0.55 mm wear layer and is classified as per EN ISO 10874 for use in the following areas.

1. Class 23, Heavy Domestic
2. Class 33, Heavy Commercial
3. Class 42, General Light Industrial

Amtico Access products are recommended for use over properly prepared concrete, suspended wood, metal and other suitable substrates used Amtico Tackifier. Amtico Access products should not be installed until all the subfloor is preparation and the works of all other trades have been completed.

Amtico Access products can be used with radiant heating systems, however the product must be fully bonded and the surface temperature of the subfloor must not exceed 27°C (81°F).

Amtico Access products are not intended for outside use.

Details of Amtico Access Cleaning and Maintenance can be found at,

<https://www.amtico.com/media/1513257/amtico-access-maintenance-guidelines-acc-ma-300916-01-gb.pdf>

## Technical Information

Property	Value, Unit
Usage Classification (EN ISO 10874)	23,33,42
Manufacturing Standard (EN 10582)	Pass
Total Thickness (EN ISO 24346)	5.0mm
Wear Layer Thickness (EN ISO 24340)	0.55mm
Weight (EN ISO 23997)	7800 g/m <sup>2</sup>
Abrasion Resistance (EN 10582)	Type 1
Residual Indentation (EN ISO24343-1)	≤0.1mm
Dimensional Stability (EN ISO23999)	≤0.5%
Dimensional Stability, Curling (EN ISO 23999)	≤1mm
Flexibility (EN ISO 24344 Method A)	Pass
Slip Resistance (DIN 51130)	R10
Slip Resistance (EN13893)	Class DS
Chemical Resistance (EN ISO 26987)	Excellent
Light Stability (EN ISO 105-B02)	≥6
Flammability /Smoke Emissions (EN 13501-1)	B <sub>fl</sub> s1
Castor Chair Resistance (EN ISO 4918) (Type W)	Pass
Impact Sound Reduction (EN ISO 717-2)	9dB
Electrostatic Performance (EN1815)	≤ 2 kV
Emissions (France - Emissions dans l'air interieur)	A+
Eurofins Indoor Air Comfort Gold	IACG-352-03-07-2018
Amtico First Technical Data Sheet is available on the Amtico website. <a href="https://www.amtico.com/commercial/technical/docs/first-collection">https://www.amtico.com/commercial/technical/docs/first-collection</a>	

## Main Product Contents

Material/Chemical Input	%
Urethane Lacquer	<0.5
Polyvinyl chloride	40
Plasticisers	15
Filler	44
Stabilisers & Pigments	<1.0

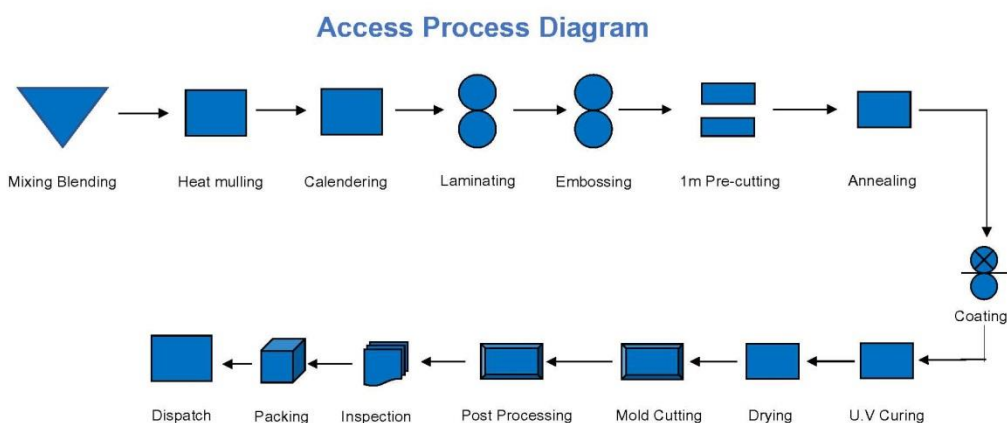

## Manufacturing Process

The product is constructed by the thermal lamination of the wear layer, print film and backing plies. The wear layer and backing plies are all manufactured as follows,

1. Required ply raw materials are initially blended.
2. The ply blend is then heated and calendered on a mill to produce a ply of the required thickness.
3. The plies required to form the end product, along with the print film, are thermally laminated together under pressure, to form the final product.
4. The product is then coated with polyurethane, before being cut to size, boxed and dispatched to the customer.

Cutting waste is recycled back into the product

## Process flow diagram

## Construction Installation

Amtico Access should be bonded with a suitably low emissions tackifier to an appropriately prepared subfloor as detailed in BS8302. Full details on installation can be found at:

<https://www.amtico.com/media/1513258/amtico-access-installation-guidelines-acc-in-300916-01-gb.pdf>

Installation off cuts can be disposed of via recycling such as AgPR, energy recovery schemes or landfilled. Wherever possible it is recommended that products should always be recycled.

## Use Information

### Emissions

Amtico Access adheres to the emission requirements of Indoor Air Comfort Gold, German AgBB/DIBt, Belgium, and is rated as A+ in the French “Emissions dans l’air interieur” scheme.

## End of Life

At the end of the product's life, the flooring is mechanically removed from the subfloor and disposed of by landfill or Incineration/energy recovery. It is assumed that the amount of energy required to remove the floor is 0.03kWh/m<sup>2</sup>.

It is assumed that 80% of the product will go to landfill, with the remaining 20% being recycled or used in energy recovery schemes. The distance travelled from the demolition site to a disposal site will be no more than 200km.

## Life Cycle Assessment Calculation Rules

### Declared / Functional unit description

1m<sup>2</sup> Amtico Access Luxury Vinyl Floor Tiles

### System boundary

Modules A1-A3: Includes raw materials, energy, water and transport processes required to make the product up to the factory gate, as well as production, packaging and general site waste.

Module A4: Transport from factory gate to UK and then to the installation site. Distance was calculated as an average based on product sales across UK, Europe, Middle and Far East.

Module A5: Floor installation, including adhesive and disposal of off-cuts and packaging.

Module B2: Electricity, water, cleaning products required to clean and maintain the product for one year.

Module C1: The amount of electricity required to remove a floor.

Module C2: Transportation of removed flooring to landfill or energy recovery site. Assumed distance is 200km.

Module C3: Waste processing of flooring waste.

Module C4: Disposal

### Data sources, quality and allocation

In addition to Amtico Access, other LVT products are also manufactured at the same production site.

Calculations were performed to enable allocation of total site energy use, water and waste to the Amtico Access production. Allocation procedures were by physical allocation and are according to EN 15804 and are based on the ISO14044 guidance

Transportation distances were calculated for Amtico First, based percentage of total square meters supplied to a distribution centre or sales region and the distance to the distribution centre or sales region.

The LCA was calculated using BRE LINA V2.0.8 with Ecoinvent

### Cut-off criteria

1. Transport distances to site were not calculated for Sales Business Units with <1% of product sales.
2. The product life was based on the commercial 10 years warranty.

## Scenarios and additional technical information

Scenarios and additional technical information			
Scenario	Parameter	Units	Results
A4 – Transport to the building site	Products are shipped to Coventry and then distributed in the UK, across Europe, Scandinavia, the Middle and Far East. The average distance transported for each geographical market was calculated by multiplying the distance travelled by the percentage sales volume by square meter. Sales regions where sales were less than 1% were not considered.		
	The sales volumes were those in 2017. The transportation data is taken from Ecoinvent datasets.		
	<b>Worldwide: Ship to UK</b>	Litre of fuel type per distance or vehicle type	303l/km
	Distance:	km	20257
	Capacity utilisation (incl. empty returns)	%	65

	Shrink Wrap	Mass per unit area of product installed kg/m <sup>2</sup>	0.001
B2 – Maintenance	<p>The required recommended cleaning and maintenance regime is dependent on the place of installation and the foot traffic over the floor. High traffic areas will generally require more cleaning and maintenance than low traffic situations. Dry cleaning may be performed with a dust mop or with a vacuum cleaner. Wet cleaning can be performed with a mop, detergent and water. Power cleaning is also a possibility with scrubber driers etc. The calculations are assumed for 1m<sup>2</sup> per year.</p>		
	52 Powered Cleaning operations a year, 1.5kW machine	kWh/m <sup>2</sup>	0.27
	52 Wet Cleans per year (Water use)	l/yr./m <sup>2</sup>	3.224
	Detergent usage	kg/yr./m <sup>2</sup>	0.0416
Reference service life	<p>Amtico International (hereinafter referred to as the Company) hereby guarantees in the event of the Amtico Access flooring supplied to the original purchaser under this agreement, requiring replacement due to 'Wear-out' from normal foot traffic, within ten years from the date of purchase, the floor will be repaired or replaced with the same or similar material free of charge. 'Wear-out' means the removal of the pattern and colour from the Amtico Access floor caused by the removal of the protective wear layer.</p>		
	<b>Commercial Product Warranty</b>	Years	10
	<p>Commercial and residential warranties can be found on the Amtico website <a href="https://www.amtico.com/commercial/technical/docs/access/">https://www.amtico.com/commercial/technical/docs/access/</a></p>		
C1 to C4 End of life,	Description of scenario		
C1	At the end of the product's life, the flooring is lifted from the subfloor and disposed of by landfill or Incineration/energy recovery.		
C2	It is assumed that 80% of the dismantled goes to land fill and the remaining 20% is incinerated for energy recovery or recycled. The disposal sites are within 200km of the demolition site.		
C3	The floor is lifted from the installation and is then processed as follows, Landfill 80%. No further processing required. Incineration/energy recovery 20%. No further processing required		
C4	Final disposal		

	Polyvinyl chloride Waste to Energy recovery	kg	1.56
	Polyvinyl chloride Waste to landfill	kg	6.24
